

Rising Plug Valves

4P and 5P Series

- Roddable, straight-through orifice for maximum flow
- Working pressures up to 6000 psig (413 bar)
- Packing below the threads
- Replaceable seat and stem tip design
- Low Emissions certification per API 624 available

Pressure-Temperature Ratings

Valves are standard with acetal seats, fluorocarbon FKM O-rings, and PTFE backup rings. Ratings are limited to:

- 250°F (121°C) max for fluids compatible with acetal seat material, except for water and steam, which are not recommended for temperatures greater than 200°F (93°C).

Ratings extend to:

- -65°F (-53°C) with Buna C O-rings.
- 400°F (204°C) with PEEK or PFA seat material and fluorocarbon FKM or Kalrez® O-rings.

To order PEEK or PFA seats, see **Ordering Information and Dimensions**.

To order optional O-ring materials, see **Options and Accessories**, page 4.

Testing

Every 4P and 5P series rising plug valve is factory tested with nitrogen at 1000 psig (69 bar). Seats have a maximum allowable leak rate of 0.1 std cm³/min. Stem and body seals are tested to a requirement of no detectable leakage using a liquid leak detector.

Cleaning and Packaging

All Swagelok® 4P and 5P series rising plug valves are cleaned and packaged in accordance with Swagelok *Standard Cleaning and Packaging (SC-10)* catalog, [MS-06-62](#).

Low Fugitive Emissions

The American Petroleum Institute's API 624 tests for fugitive emissions to atmosphere for rising stem valves. The tests are conducted at a third party lab and certify that at no point in the test did the valve leak in excess of 100 ppm of methane. Certificates stating that the valve is certified for Low Emissions service are available for valves with standard Fluorocarbon FKM o-ring. For more information, contact your authorized Swagelok sales and service representative.

Ordering Information and Dimensions

Dimensions, in inches (millimeters), are for reference only and are subject to change.

Stainless Steel Valves

Select an ordering number.

Alloy 400 Valves (5P Series)

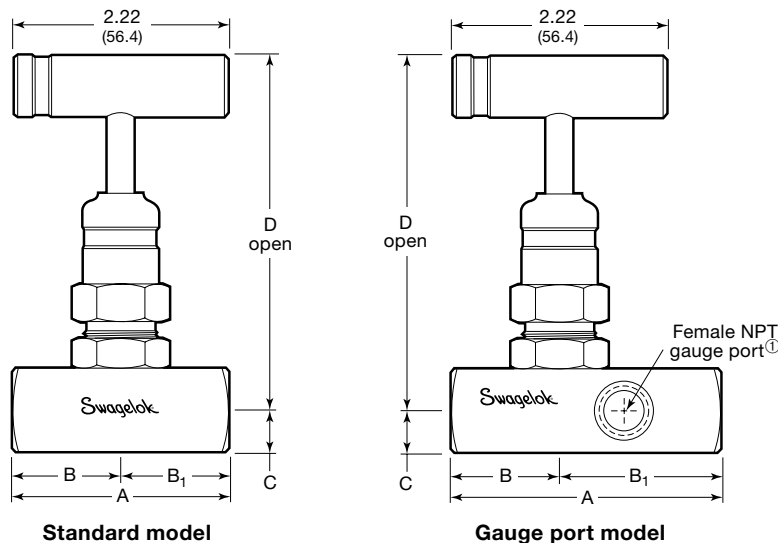

Replace **SS** with **M**.

Example: **M-5PDF8**

Optional Seat Materials

Acetal seats are standard. For optional seat materials, replace **D** in the ordering number with **P** for PEEK or **T** for PFA.

Example: **SS-4PPF4**

^② Alloy 400 valve dimension C is 0.63 in. (16.0 mm).

^③ Has 2 in. (50.8 mm) lagging extension body for insertion through pipe insulation.

Options and Accessories

Optional O-Ring Materials

Fluorocarbon FKM O-rings are standard. For other O-ring materials, add a designator to the valve ordering number.

O-Ring Material	Designator	Temperature Rating °F (°C)
Buna C	-BC	-65 to 250 (-53 to 121)
Buna N	-B	-20 to 250 (-28 to 121)
Ethylene propylene	-E	
Kalrez	-KZ	-20 to 400 (-28 to 204)
Silicone	-SI	-20 to 250 (-28 to 121)

Example: SS-4PDF4-**BC**

Seal Maintenance Kits

Maintenance kits contain stem tip, fluorocarbon FKM O-ring, PTFE backup rings, seat, lubricants, and instructions. Select a kit ordering number.

Seat Material	Kit Ordering Number
Acetal	SS-9K-5PD
PFA	SS-9K-5PT
PEEK	SS-9K-5PP

To order kits for alloy 400 valves (5P series only), replace **SS** with **M**.

Example: **M**-9K-5PD

Special Cleaning and Packaging (SC-11)

To order 4P and 5P series rising plug valves cleaned and packaged in accordance with Swagelok *Special Cleaning and Packaging (SC-11)* catalog, [MS-06-63](#), to ensure compliance with product cleanliness requirements stated in ASTM G93 Level C, add **-SC11** to the valve ordering number.

Example: SS-4PDF4-**SC11**

⚠ To increase service life, ensure proper valve performance, and prevent leakage, apply only as much torque as is required to achieve positive shutoff.

Panel Mounting

Panel mounting is available. A stainless steel panel nut is assembled onto a threaded bonnet. The maximum panel thickness is 1/2 in. (12.7 mm), and the panel hole size is 25/32 in. (19.8 mm).

To order, add **-PM** to the valve ordering number.

Example: SS-4PDF4-**PM**

Sour Gas Service

Both 4P and 5P series rising plug valves are available for sour gas service. Materials are selected in accordance with NACE MR0175/ISO 15156.

Materials

Body, bonnet: annealed 316 SS

O-ring: ethylene propylene, silicone-based lubricant

Stem shank: strain-hardened 316 SS/ASTM A176 with tungsten disulfide and fluorinated-based lubricant on threads

Stem tip: alloy 400/ASTM B164

All other components are the same as standard product.

Pressure-Temperature Ratings

Ratings are the same as standard 316 SS valves with acetal or PEEK seats and ethylene propylene O-rings.

Ordering Information

To order, add **-SG** to the valve ordering number.

Example: SS-4PDF4-**SG**

Oxygen Service Hazards

For more information about hazards and risks of oxygen-enriched systems, refer to Swagelok *Oxygen System Safety* technical report, [MS-06-13](#).

Introduction

Since 1947, Swagelok has designed, developed, and manufactured high-quality, general-purpose and specialty fluid system products to meet the evolving needs of global industries. Our focus is on understanding our customers' needs, finding timely solutions, and adding value with our products and services.

We are pleased to provide this global edition of the book-bound *Swagelok Product Catalog*, which compiles more than 100 separate product catalogs, technical bulletins, and reference documents into one convenient, easy-to-use volume. Each product catalog is up to date at the time of printing, with its revision number shown on the last page of the individual catalog. Subsequent revisions will supersede the printed version and will be posted on the Swagelok website and in the Swagelok electronic Desktop Technical Reference (eDTR) tool.

For more information, visit your Swagelok website or contact your authorized Swagelok sales and service representative.

Warranty Information

Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.

Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

WARNING

Do not mix/interchange Swagelok products or components not governed by industrial design standards, including Swagelok tube fitting end connections, with those of other manufacturers.
